ROMÂNĂ A INVENTARULUI PENTRU EVALUAREA
ANXIETĂȚII FAȚĂ DE TESTARE (TAI)**

**STANDARDIZATION OF A ROMANIAN SHORT VERSION OF
TEST ANXIETY INVENTORY (TAI)**

Viorel Robu*

Abstract

The standardization of a short Test Anxiety Inventory version in Romanian language was based on the practical reason of facilitating various research design implementations. The analyses were based upon the answers given by 1914 high school students to the long Romanian TAI version. Three short versions including six, eight, respectively ten items were compared from a psychometric perspective. Judging by the internal consistency coefficients and factorial structure, the eight item version (TAI-8) proved to be the most satisfying.

Keywords: Test Anxiety Inventory (TAI), short Romanian version (TAI-8), items selection, reliability, factorial structure
